Qualio was founded in 2012 with a simple but important mission: to help life science organizations bring their vital products to market with a faster, stronger, more quality-centric approach.

Over 600 life science and healthcare businesses across the globe use Qualio to centralize, optimize and automate their quality management systems.

Qualio is a scalable and flexible cloud-based system that grows with your business and makes meeting your quality requirements truly simple, from ISO 13485 and ISO 17025 accreditation to FDA and GxP compliance.

“

When we ran this year's annual life science quality professional survey, we asked our respondents to share any lessons they'd learned in the past year.

One stood out: "you can't fix what you can't see".

This same philosophy runs straight through the analytics functionality of our software.

We know that fast, easy access to insightful data is crucial for your day-to-day quality work.

This datasheet highlights how our software pairs holistic quality management functionality with automated analytic reporting to put your quality landscape at your fingertips.

Manager, Quality and Customer Support

Analytics for proactive quality management

Qualio Analytics surfaces system data from the Documents, Training, Events and Suppliers sections of our software to unlock at-a-glance visibility of your operational performance. Use Analytics for:

1. Document, training, event and supplier data

Drill into key system metrics for your quality events, suppliers, documentation and training, from cycle times to trends and task status, to keep things moving, allocate resources effectively and stop bottlenecks.

2. Proactive quality

Easily surface trends, overdue actions and weak spots to take responsive action and optimize your operational quality and compliance.

3. Audit readiness

Ensure nothing is missed before an audit – then show your auditor digestible real-time quality data during it.

4. Internal info-sharing

No more exporting QMS data into pivot tables for your next management review. Show QMS activity and progress quickly and easily.

5. Taking the temperature

Understand where your colleagues are up-to-date with their quality responsibilities, and where blockages and delays are occurring.

Key system features

Document, training, event and supplier data at your fingertips

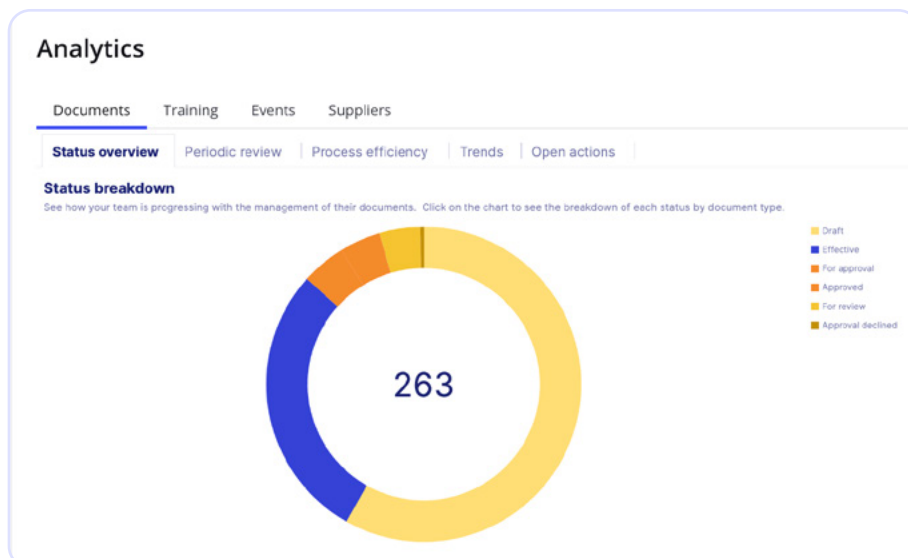

In a living, breathing eQMS, your document, training, event and supplier record numbers only go in one direction: up.

But that doesn't have to mean confusion and chaos. Quickly drill into key system data points straight from the Analytics screen. View open and closed events, filtered by product, root cause, owner and more. Check out document statuses and filter by tags. Explore your supply chain at a glance, including upcoming review tasks. Or dive into training overviews, trends, departmental statuses, pending actions and more.

In the past, we had multiple spreadsheets which needed pulling together. It took days. Now I can build management reports the day of the meeting, because I can pull the information right out of Qualio!

— Stan Spagnuolo

Director of Quality Assurance, Koneksa

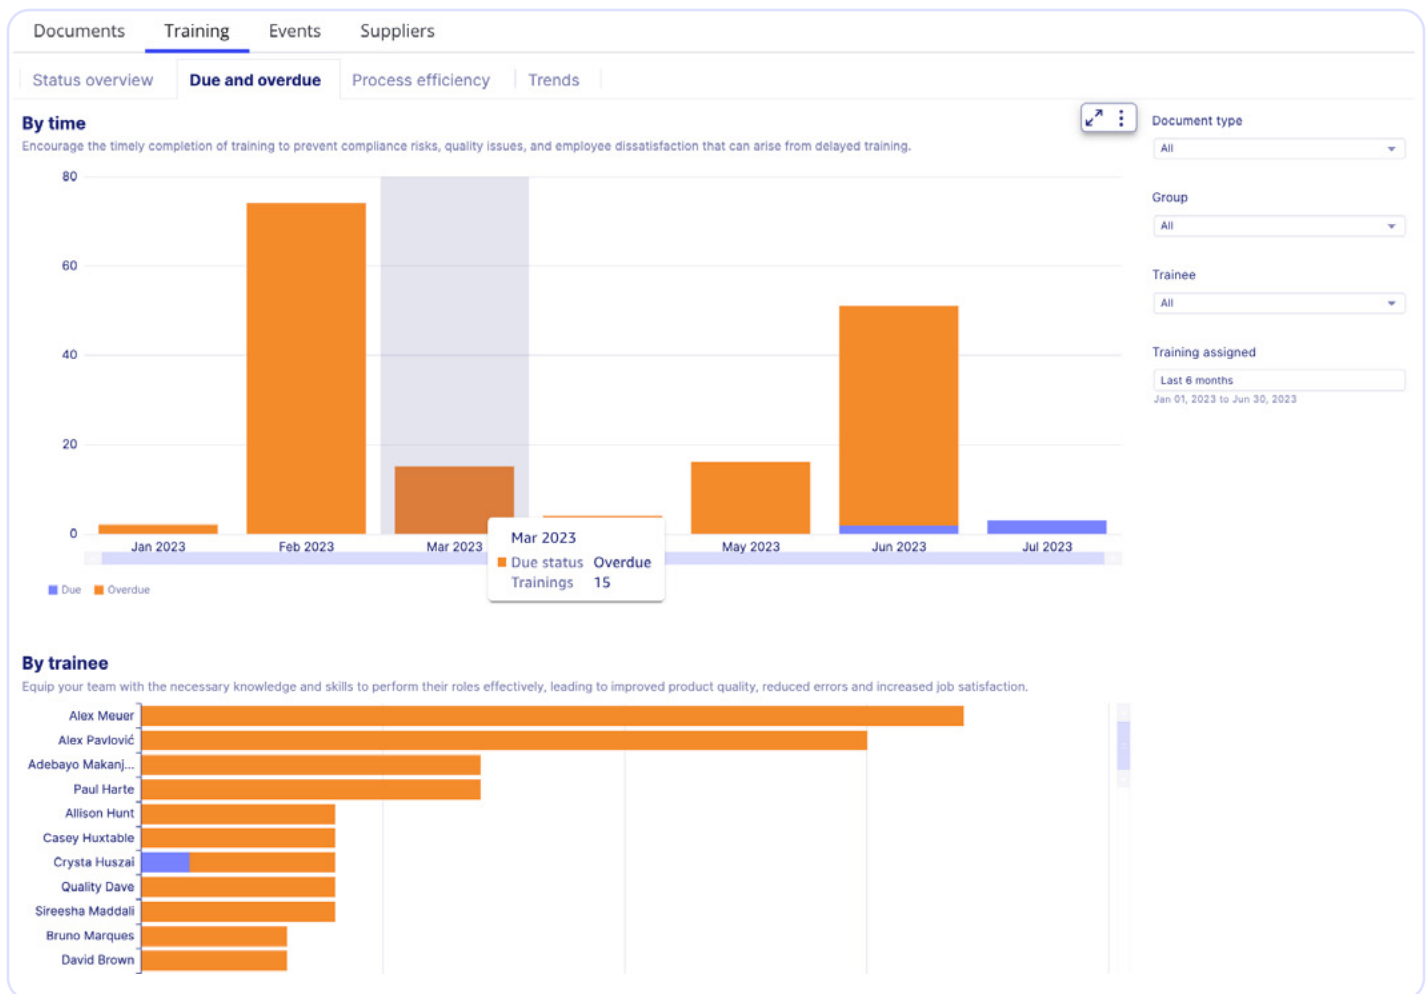

Documents analytics screen showing breakdown of documents by lifecycle status

Real-time insights for on-time actions

Explore due and overdue document, training, event and supplier tasks, across bespoke time periods and by owner. And ensure accountability with system reports of pending steps, tasks and actions by user.

Qualio Analytics makes it easy to make the right quality decisions, backed by up-to-date info.

- Pinpoint bottlenecks and open them to ensure CAPAs, deviations and non-conformances are closed out promptly.
- Capture how your QMS is performing and share it with colleagues, senior leadership and auditors.
- Plan ahead and allocate resources strategically, and spot underlying patterns and quality issues early.

Stronger quality and compliance

Data's only as useful as what you can do with it. Qualio Analytics surfaces actionable insights to make your business stronger.

- Check document, supplier and event cycle times to see how strong your throughput and remediation processes are.
- Compare issues across products and allocate resources accordingly to get your entire range safe and market-ready.
- Spot patterns in overdue training and supplier diligence, then proactively reach out to groups and individuals to shore up compliance and audit-readiness.
- And drive accountability and communication across your company, making quality everyone's responsibility, by tracking and tracing assigned actions to completion.

See what needs to be done, when, and by whom to keep your company constantly audit-ready

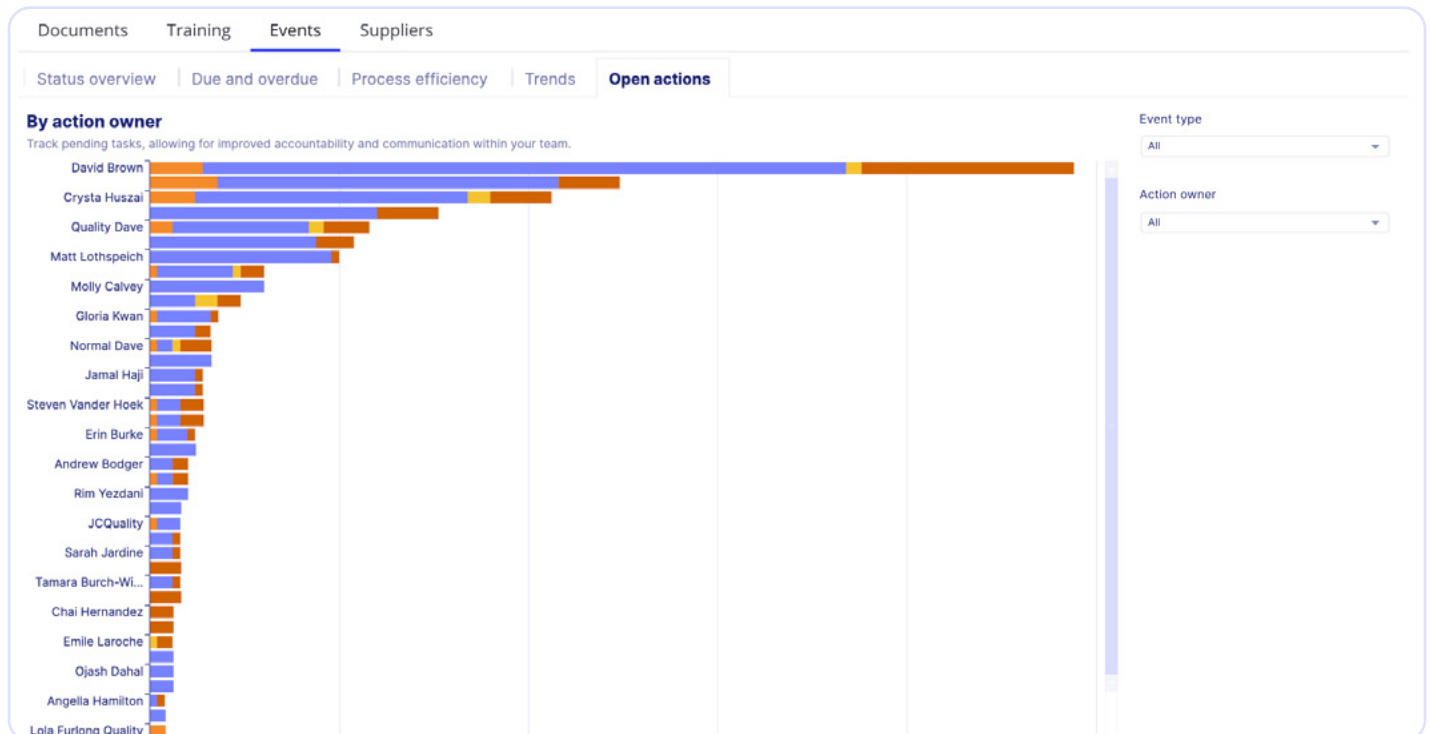

Exportable information when you want it

Enjoy snapshot visibility of:

- Open and closed events
- Statuses across document versions
- Due and overdue training actions
- Due and overdue supplier reviews
- Time taken to resolve events by type
- Document cycle times
- Event creation trends
- Group and individual training performance

And more.

Drill into summary background data, and export as a CSV.

12 reasons to use Qualio Analytics

01.

Present visual QMS insights to colleagues, customers and auditors

02.

Ensure accountability by surfacing blockages and missed actions

03.

Export analytic charts and data for further use

04.

Apply custom filters to get the info you need

05.

Replace murky paper and spreadsheet processes with always-on digital insight

06.

Make smart, data-driven decisions: plan proactively and route actions to get things done

07.

Save up to 1 FTE of export and analysis work by automating

08.

Prepare for management reviews in minutes, not days

09.

Drive continuous improvement with the right data

10.

Access digestible system data at the click of a button

11.

Understand how your QMS works in real time

12.

Make your company constantly ready for regulatory inspection by spotting trends and underlying issues, then tracing actions to completion

Set-up and services

Life science quality expertise and commitment to partnership

An excellent life science quality management system can't be achieved with a single tool alone. It requires time, energy, resource and expertise.

Qualio commits to a long-term partnership with our customers, from the exciting infancy days of start-ups to post-market growth and expansion.

Our services include:

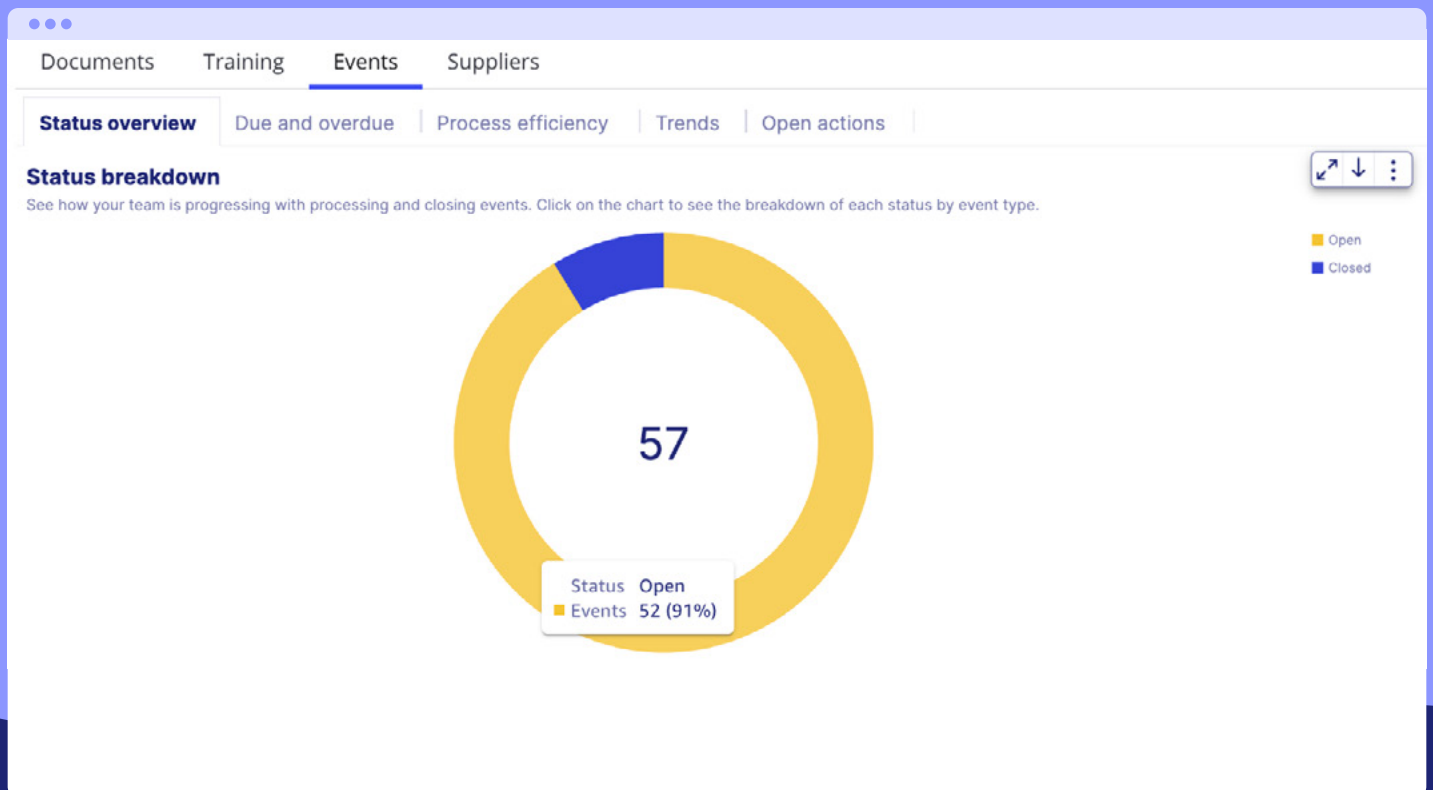

- Simple and painless CSA validation to get your platform up and running quickly
- Best practice [onboarding](#) and [support](#)
- Pre-built QMS document templates and pathways
- Migration of your legacy documents
